

PRESENTAZIONE INTRODUCTION

STORIE AZIENDALI

"Non saremo mai forti nella zona giorno, tanto vale eliminarla e concentrarci sugli armadi." È stato questo messaggio a spingermi a immaginare Dress Code, poiché non sopporto l'idea di rinunciare a qualcosa senza neanche provarci. Posso accettare di non riuscire, ma non posso accettare di non provare.

Dress Code è nato con il presupposto che non sarebbe mai esistito se non fosse stato qualcosa di eccezionale e unico. Oggi, a quattro anni dalla sua prima presentazione, lo completiamo e lo evolviamo in un progetto totale, finalmente pronto al cento per cento a esprimere la sintesi di oltre 95 anni di storia aziendale, integrando alla perfezione zona giorno e zona notte.

Olivieri non è e non va interpretata come un'industria verticalizzata ai volumi, e nemmeno come una classica falegnameria. Olivieri è un ibrido, una grande falegnameria industrializzata, un'azienda unica nel suo genere: a queste caratteristiche si ispira il nostro modo di interpretare la casa.

Anche il nome che abbiamo selezionato è perfetto per quello che vogliamo trasmettere: "Dress" è l'abito su misura, la sartorialità, la falegnameria; "Code" è il nostro codice industriale, la codifica e la modularità, che sono basi di partenza fondamentali per elaborare ogni progetto che produciamo.

Il nostro obiettivo è sempre stato solo uno: mettere in perfetta relazione l'industria e la progettazione. Due mondi molto distanti, che solo Olivieri poteva unire in un'unica collezione.

Michele Sartini

COMPANY HISTORY

"We will never be strong in the living area, we might as well eliminate it and focus on wardrobes." With this message it all started. I can't stand the idea of giving up on something without even trying. I can accept failure, but I can't accept not trying.

Dress Code was born with the assumption that it would have never existed if it hadn't been something exceptional. Today, 4 years after its first presentation, we complete and develop it into a total project, finally 100% ready to express the synthesis of over 95 years of company history, perfectly integrating the night and living areas.

Olivieri is not and it doesn't have to be interpreted as a company verticalized on volumes and neither as a carpentry. Olivieri is a hybrid, a big industrialized carpentry, a unique company of its kind: our way of interpreting the home takes inspiration from these characteristics.

Even the name we have chosen is perfect for what we want to convey: "Dress" is the tailored suit, the tailoring, the carpentry; "Code" is our industrial rule, the classification and the modularity that are the fundamental starting points to develop each project we realize.

Our aim has always been only one: put industry and design in a perfect relationship. Two very distant worlds that only Olivieri could combine in a single collection.

Michele Sartini

Pelli di provenienza europea, conciate al cromo, tinte in botte con aniline e rifinite a pieno fiore, leggermente rettificata. Spessore 1,1-1,3 mm.

Full grain leather of european origin, chrome tanning processed, painted in barrel with aniline. Thickness 1-1,3 mm.

Cat. Pelle vintage

Category Extra leather

Pelli di provenienza europea, ad effetto invecchiato. Questo articolo di alta qualità è ottenuto partendo da una pelle nubuck, che viene leggermente ugualizzata con aniline ed abrasivata a mano per dare un effetto invecchiato. La mano è molto calda e setosa. Spessore 0,9-1,1 mm.

Full grain leather of european origin, aged effect. This is a high quality item made starting from a nubuck leather, brushed by hand, so uneven and aged final effect. The touch is smooth and warm. Thickness 0,9-1,1 mm.

Tamburato

Olivieri si differenzia sul mercato per i materiali di alta qualità che caratterizzano le proprie collezioni.

Il materiale più pregiato, più utilizzato, e di cui possiamo ritenerci i leader italiani, è sicuramente il TAMBURATO. Siamo una delle pochissime aziende rimaste in Italia che si differenzia per la produzione del proprio sistema armadi per essere completamente realizzato in tamburato (struttura ed ante).

Cos'è il TAMBURATO?

il Tamburato è un pannello realizzato con struttura interna in alveolare, e da un telaio perimetrale di 7 cm in massello di abete di prima scelta chiuso con 2 pannelli in MDF di spessore 0,3cm o 0,4cm; che poi verranno o laccati o impiallacciati.

Quali sono i Punti di forza?

1. maggior durevolezza nel tempo;
2. maggiore resistenza al carico;
3. peso dei pannelli notevolmente ridotto, utile sia per trasporto, montaggio, spostamenti o traslochi, sia per ridurre il peso delle ante sulla struttura e sulla ferramenta.
4. Negli armadi battenti, la ferramenta viene fissata sempre sul perimetro (in massello di abete) dei fianchi e ante, quindi le cerniere avranno una resistenza maggiore e i mobili avranno una durata notevolmente superiore;
5. Negli armadi scorrevoli, i top della struttura in tamburato hanno sicuramente il vantaggio di mantenere in linea retta il meccanismo di scorrimento, che funzionerà meglio e più a lungo.
6. migliore resistenza all'umidità, in quanto il materiale "respira".
7. prodotto esclusivamente "100% made in Italy".

Honeycomb ply

Olivieri diversify itself in the market for its high quality materials which characterise its collections. The most precious and used material, of which we can also consider ourselves among the Italian leaders, is the HONEYCOMB PLYWOOD. We are one of the least companies in Italy which diversify itself for producing a whole collection named "Armadi 360 gradi" (Wardrobe 360 grades) using only the honeycomb plywood (for both structure and doors).

What is the HONEYCOMB PLYWOOD?

The Honeycomb plywood is a wood panel made by an internal alveolar structure and a 7 cm frame in solid fir wood. The closure panels are in MDF, thk. 0,3 or 0,4, which are lacquered or veneered.

What are the key factors?

1. Greater durability over time;
2. Better resistance to weight;
3. Panels are less heavy, this is useful during transportation, mounting, movements and also for reducing the door's weight on the structure and on the hardware;
4. In swing wardrobes the hardware is always fixed on the sides' and doors' frame (in solid fir wood), so the hinges will be more resistant and the wardrobes will last longer;
5. In sliding wardrobes the top of the structure in honeycomb plywood has the advantage of keeping the sliding mechanism perfectly straight which will work better and longer;
6. Better moisture resistance, that's because it's a "breathing" material;
7. An exclusive "Made in Italy" material.

Il Tammel

La ricerca della qualità comincia dallo studio e dalla realizzazione della struttura dei nostri armadi. Il TAMMEL è un materiale di nostra concezione: il tamburato è con telaio in massello d'abete accuratamente selezionato e il nido d'ape placcato con pannelli in MDF in royal o grafis. Il Tammel garantisce indeformabilità nel tempo, leggerezza, praticità e risponde a tutti i requisiti delle Norme Europee di classe 1 in ordine alla limitazione delle emissioni nocive di formaldeide.

The search of quality begins with the study and the realization of our wardrobes' structure. TAMMEL is a material of our conception: the honeycomb-plywood is made by a frame in solid and carefully selected fir wood and an internal alveolar structure. Everything covered by MDF panels in Royal or Grafis finishing. Tammel guarantees non-deformability over time, lightness, practicality and it meets all the requirements of the European Class 1 regulations regarding the limitation of harmful emissions of formaldehyde.

Montaggio sicuro e garantito

Tutte le soluzioni adottate consentono operazioni di montaggio semplici e veloci, gli addetti al montaggio dei nostri rivenditori sono tecnici specializzati e garantiscono un perfetto assemblaggio delle parti. La nostra organizzazione prevede inoltre un servizio di assistenza post-vendita per ogni evenienza e necessità, a totale garanzia della clientela.

Easy and guaranteed assembly

All solutions allow fast and easy assembly operations. Our dealers' assemblers are specialized technicians and guarantee a perfect assembly of the parts. Our organization also provides a post-sales assistance service for any eventuality or need, with total customer guarantee.

Note per il montaggio:

Spazio necessario per il montaggio dell'armadio:
 SENZA ANTE O CON ANTE BATTENTE/SOFFIETTO: 2 cm. in altezza / 4 cm. in larghezza
 CON ANTE SCORREVOLI: 4 cm. in altezza / 4 cm. in larghezza
 CON ANTE COMPLANARI: 8 cm. in altezza / 4 cm. in larghezza

Fitting details:

Required space for wardrobe assembly:
 WITHOUT OR WITH SWING AND FOLDING DOORS: 2 cm in height / 4 cm in width
 WITH SLIDING DOORS: 4 cm in height / 4 cm in width
 WITH COPLANAR DOORS: 8 cm in height / 4 cm in width

Vernici

Olivieri S.r.l. utilizza per i propri colori e per le proprie essenze componenti atossici nel pieno rispetto delle norme Europee.

Rovere poro aperto: tinto all'acqua, fondo e finiture acrilico.

Laccato colori opachi: finitura poliuretana 15 gloss, texture goffrata superfine.

Laccato colori lucidi: su base poliestere laccato poliuretano più due mani di acrilico trasparente spazzolato.

Differenze di venatura ed il viraggio di colore nel tempo non costituiscono un difetto, ma sono il risultato del naturale processo d'invecchiamento del legno o della pelle.

Lacquering

Colours and wood used by Olivieri S.r.l. do not contain any toxic components, in full respect of European standards.

Oak veneered: Water painting, Acrylic finishing.

Mat colours lacquered: Polyurethane lacquering, 15 gloss.

High gloss lacquered colours: Polyurethane lacquering plus brushed transparent acrylic coating.

In the time it is possible that the grains or the colours can endure some differences. This is not a defect but the normal result of the aging of natural wood or leather.

Ferramenta di qualità

Tutta la ferramenta viene premontata per facilitare e velocizzare le operazioni di montaggio. Le ante a battente sono dotate di 4 cerniere metalliche rallentate e battuta para polvere in gomma. Le ante battente Glass e Fab hanno la speciale caratteristica di essere incernierate solamente sulla base e sul cappello. Le ante soffietto dispongono di un meccanismo di chiusura rallentato incernierato sui fianchi. Le ante e gli antoni scorrevoli sono dotate di un meccanismo magnetico di ultima generazione che ne garantisce una affidabilità assoluta. I binari arrivano al cliente con tutti i fermi già premontati e vanno assemblati alla scocca dell'armadio con fissaggio dall'interno. I piedini, anch'essi pre-montati sui basamenti, consentono il corretto livellamento dell'armadio.

High quality hardware
 All our hardware is pre-mounted in order to simplify and speed up the assembly operations. The swing doors have 4 metal hinges and rubber dust stop. Glass and Fab swing wardrobes have the special characteristic of having the hinges only on the base and the top. The folding doors have a slow-closing mechanism whose hinges are on the sides. Sliding and big sliding doors have the latest generation magnetic mechanism that guarantees absolute reliability. The guide rails get to the customer already pre-mounted and they must be assembled from the inside into the wardrobe's structure. The feet, also pre-mounted on the basis, allow the correct leveling of the wardrobe.

1. Premontaggio cerniere per ante battenti e carrelli per ante scorrevoli
2. Sistema di consegna basi cappelli e fianchi con premontati piede, zoccolo e basette.
3. Premontaggio fermo porta su binario scorrevole come da disegno cliente.
4. Esempio di imballo antoni maxi scorrevoli con carrelli e staffe d'unione premontate.

1. *Premounting swing door's mechanism and sliding doors trucks*
2. *Delivery of bases, tops and sides with pre-mounted feet, aluminium frame and hardware.*
3. *Premounting of door holder on sliding rail on client' request.*
4. *Packing example of sliding big antone door with premounted trucks and horizontal frame for panel junction.*

CAMINO: note tecniche, montaggio ed assistenza clienti

CHIMNEY: technical data, assembling and customer service

CAMINO vapore

VAPOR CHIMNEY

1. CAMINO A VAPORE BASIC

Il camino a vapore versione "basic" funziona ad acqua distillata e non ha bisogno di canna fumaria. Può essere collegato all'impianto idraulico munito di addolcitore ed è impostata un effetto della fiamma colore naturale. È dotato di telecomando ed è conforme agli standard di sicurezza CE (Europa).

Per assistenza rivolgersi a:

Maison Fire
email: sales@maisonfire.com
T. +39 0362 903747

Note tecniche per il primo avviamento

1. Inserire la spina alla presa della corrente elettrica;
2. Mettere l'acqua distillata nei serbatoi;
3. La prima accensione deve essere fatta tenendo premuto il tasto on/off per 5 secondi.

Sovrapprezzo predisposizione per inserimento altri camini a vapore non a listino su box giorno: + 288,00

Customization surcharge for assembling vapor chimney out of this price list on open box:

1. BASIC STEAM FIREPLACE

"Basic" steam chimney works with distilled water and it doesn't need any exhaust pipe. It can be connected to the water softener system and it gives a natural flame effect. Remote control is available and it is in compliance with the UE standard security regulations (Europe).

Technical notes for the first start-up

For customer service contact:
Maison Fire
email: sales@maisonfire.com
T. +39 0362 903747

1. Insert the plug into the electrical socket;
2. Put the water in the tanks;
3. The first ignition must be done by holding down the on / off button for 5 seconds.

Il camino funziona unicamente con corrente elettrica. È dotato di telecomando ed è conforme agli standard di sicurezza CE (Europa). È possibile utilizzare l'app E-SMART con smartphone Android od Apple per configurare e comandare il camino. In questo caso è necessaria una rete wireless.

Il camino elettrico è integrabile alle versioni di seguito indicate dei blocchi 3 e 4 del listino Dress Code 06.2022, sostituendo il box giorno con una struttura dedicata comprensiva di una cornice frontale a filo ante, laccata nei colori opachi o metallici (vedi immagine).

Per assistenza rivolgersi a:

British Fires
email: a.ciccotti@britishfire.com
T. +39 06 822647

The fireplace works only with electricity. It is equipped with a remote control and complies with CE (Europe) safety standards. The E-SMART app can be used with an Android or Apple smartphone to set up and control the fireplace. In this case, a wireless network is required.

The electric fireplace can be integrated with the versions indicated below of blocks 3 and 4 of the Dress Code 06.2022 price list, replacing the open box with a proper structure that has a front frame, flush with the doors, lacquered in matt or metallic colors (see image).
