

NIGHTINGALE

Esstisch

Design
Nick Pyka

Ungehobelt und
ursprünglich

Brachial und stolz wie ein altes Burgtor präsentiert sich der Nightingale Esstisch. Die robuste massive Eichenplatte ruht auf einem konisch zulaufende, geöffneten Flachstahlgestell. Das Zusammenspiel dieser kontrastreichen natürlichen Materialien bildet eine beeindruckende kraftvolle Einheit. Der Nightingale positioniert sich selbstbewusst im Altbau oder in moderner Architektur.

Brachial and proud like an old castle gate, the Nightingale dining table presents itself. The robust solid oak top rests on a conically tapered, open flat steel frame. The interplay of these contrasting natural materials forms an impressive, powerful unit. The Nightingale positions itself self-confidently in the old building or in modern architecture.

↑ HIDE SURFACES AND DIMENSIONS

Laminated ASCO table tops (multiplex) are manufactured in a thickness of 28mm. Birch wood layers are glued lengthwise and crosswise. The layered top is then veneered in the desired solid wood, brushed with open pores and oiled once. A 6 cm thick end-grain glue is applied to the long and short sides in the matching solid wood, which also allows the individual selection of ASCO table edges and corners.

↑ HIDE SURFACES AND DIMENSIONS

Board-glued ASCO table tops are made of individual continuous 8-15 cm wide solid wood slats glued together lengthwise. The woods are carefully sorted and selected, creating a naturally balanced character and giving the solid wood table top its harmonious overall appearance. Viewed from the front, alternating horizontal and vertical annual rings are visible, which show an attractive wave pattern.

Burned oak black, brushed with texture, oiled

Traditionally brushed and, if desired, burnt, oiled or pigmented surface. The natural wood features of the RohDesign solid wood tabletop, glued from three planks, are strongly emphasised by hand. Sapwood is removed, while natural features such as swirls in the wood and knots are particularly emphasised. Dry cracks are very likely here. Each raw design panel is hand-hammered with an axe according to traditional craftsmanship. RohDesign solid wood qualities are textured brushed and oiled in 2 mm relief depth.

RohDesign cross-cut wood

A look into the soul of the tree. End-grain or face-grain is the term used to describe the areas of wood cut at right angles to the longitudinal axis, which show the annual rings as circles or circle segments. The liveliness of the elegant, expressive solid wood top made of 6 cm thick end-grain blocks in variable sizes is shown in the oak cubes cut lengthwise with a view of the annual rings. The individual elements are glued together and processed into a sustainable end-grain slab.
