

Tercio^{neu}

Esstisch

Design
ASCO

Leitmotiv
Architektur

Zwei konkav geformte Stahlwangen tragen die Tischplatte des einzigartigen Tercio. Das Design spielt mit den Lichteffekten der facettenartig gefalteten Stahlflächen, die im Kontrast zu der natürlichen Maserung der hochwertigen Tischplatte stehen. Die filigranen Wangen bieten großzügigen Fußraum und können auf Wunsch farblich beschichtet werden. Durch seine optische Leichtigkeit platziert sich der Tercio im modernen Wohn-Essbereich oder im anspruchsvoll gestalteten Office.

Two concave steel cheeks support the solid wood tabletop of the unique Tercio. The design plays with the light effects of the facet-like folded steel surfaces, which contrast with the natural grain of the high-quality tabletop. The filigree cheeks offer generous legroom and can be colour-coated on request. Thanks to its visual lightness, Tercio can be used in modern living and dining areas or in sophisticated office settings.

↑ HIDE SURFACES AND DIMENSIONS

Laminated ASCO table tops (multiplex) are manufactured in a thickness of 28mm. Birch wood layers are glued lengthwise and crosswise. The layered top is then veneered in the desired solid wood, brushed with open pores and oiled once. A 6 cm thick end-grain glue is applied to the long and short sides in the matching solid wood, which also allows the individual selection of ASCO table edges and corners.

↑ HIDE SURFACES AND DIMENSIONS

Board-glued ASCO table tops are made of individual continuous 8-15 cm wide solid wood slats glued together lengthwise. The woods are carefully sorted and selected, creating a naturally balanced character and giving the solid wood table top its harmonious overall appearance. Viewed from the front, alternating horizontal and vertical annual rings are visible, which show an attractive wave pattern.
